CITY CLERK

Members of the City Council:

At last week's meeting you had asked for a map and listing of the streets being resurfaced or reconstructed as a part of the Community Crossings Matching Grant. Department of Engineering staff has created a great webmap depicting the streets that you can view [here](#). As noted at the meeting, it is currently out for bid with a planned award date of February 26th and work should begin during the month of March. Below you will find a listing of the streets:

Milling and repaving:

- 7th street from East Beech Street to Maple Avenue
- Beech Street from North Fruitridge Avenue to Schulte Street
- Maple Avenue from North 13th Street to North 7th Street
- Maple Avenue from 25th Street to North Fruitridge Avenue
- Oak Street from South 3rd Street to South 9th Street
- Oak Street from South 12th Street to 25 Street
- Park Street from South 14th Street to South 22nd Street
- Schulte Street from East Beech Street to East Old Maple Avenue
- 17th Street from Crawford Street to Wabash Avenue

Removing old railroad ties, milling and resurfacing:

- 17th Street from Crawford Street to Franklin Street

Reconstruction of:

- Center Street from College Avenue to Deming Street

If you have any further questions regarding the project feel free to contact me.

Thanks,

Marcus Maurer P.E.
