CITY CLERK

Michelle,

Could you please share the information below with the City Council regarding questions that they had last night. I went ahead and included Todd on this email as he had asked for the information. We provided a cost for lane miles as it is a better indicator of average costs, so a 2 lane road would cost 2 times the cost of center the lane miles etc. Let me know if you need anything else.

Thanks,

Marcus Maurer P.E.

City Engineer

Subject: RE: Can you help me out tomorrow

The discussion we had yesterday and this morning:

- \$728,623 per *Center Line Mile* for a **Total Reconstruction (pavement only including 6" subbase, light duty pavement)**
- \$57,942 per *Lane Mile* for our standard **1 ½" Mill & Fill with 70/22 oil**
- Numbers vary but safe to say that we have about 350 *Center Line Miles* of paved roads in the City of Terre Haute (state says 349 and Roadbotics says 357)

Hope this helps. Let me know if you need anything else.

~Brad
