CITY CLERK

Hello, Council Members.

I am writing to extend an invitation to you to participate in the City of Terre Haute MS4 annual contractor training event this Thursday (11/16/17) from 8:00 to noon at the Wastewater Utility.

The City of Terre Haute is the lead permittee of our State issued Municipal Separate Storm Sewer System (MS4) permit. We have a co-permit group that includes the City, the County, West Terre Haute, Seelyville, ISU, IvyTech, and Rose-Hulman. I am the coordinator for the group and Debbie Padgett is the MS4 Operator.

The permit requires us to address six minimum control measures to prevent or eliminate polluted stormwater runoff from our urbanized areas:

- Public education & outreach
- Public participation & involvement
- Illicit discharge detection & elimination
- Construction site runoff control
- Post-construction management
- Pollution prevention & good housekeeping for municipal operations

Did you know that sediment is the number one pollutant by volume in our nation's rivers, lakes and streams?

One aspect of our construction and post-construction program involves providing annual education and training to the contractors, developers, designers and inspectors that are involved with construction projects that disturb more than 1 acre of land.

This year's annual training event includes a presentation from Indiana Department of Environmental Management Office of Water Quality, a review of site inspector responsibilities, a discussion about maintenance practices to prevent water pollution, and product demonstrations from leaders in the field of erosion and sediment control.

I have attached a copy of the workshop flyer and a schedule of events. I hope you can make time to attend this training event and learn about what we are doing to help protect our waterways!

If you would like to attend, please respond to this email or call Mindy at the Wastewater Utility, 812-244-5500, to register.

Thank you.

Alicia Barnard

Our River Begins at YOUR Front Door - Help us protect it.
